QM-002 Quality Policy

1. Quality Policy Statement

Torchworx LLC delivers machined parts that meet every drawing and purchase order requirement, on time, with honest records. Requirements are reviewed before work is accepted. Parts are inspected, problems are communicated to the customer, and lessons learned are used to improve shop practices. Torchworx LLC supports the quality philosophy of its customers.

This policy states commitments and operating expectations. Torchworx LLC is not certified to AS9100, ISO 9001, ISO/IEC 17025, NADCAP or any other quality standard, and does not claim or imply compliance with those standards. References to standards are for guidance and best practice, not evidence of certification, implementation or assessed compliance.

Customer Requirements and Product Conformity

Review drawings, specifications, purchase orders and changes before accepting work. Inspect and release product against the agreed job requirements. Repair, use-as-is or deviations require prior written customer authorization.

Ethics and Product Safety

Record results honestly, report concerns and keep unresolved suspect product from being shipped. The actual use and requirements of each job govern the necessary controls.

Improvement

Use customer feedback, inspection results, nonconformances and reviews to improve shop practices and quality-system effectiveness.

Applicable Obligations

Identify and meet customer, contractual and legal requirements applicable to the accepted work. A specific standard requirement imposed by a customer applies to that work; it does not establish organization-wide standard compliance or certification.

2. Policy Use and Implementation

QM-001 §3.1 contains the quality policy, and QM-001 §6 defines the consolidated operating controls. Supporting procedures, forms and objectives provide guidance for the applicable controls. A document reference does not establish that a process has been implemented, a review completed or an outside service contracted.

3. Communication and Review

On adoption, make the applicable policy available to persons performing work and communicate it as appropriate. Record actual approval, distribution and reviews. Posting, training and review are not represented as complete merely because they are described here.

4. Approval

Field	Entry
Owner	Jacob Honick
Effective date	2026-08-10
Revision approval date	2026-11-05
Approved by	Jacob Honick, Owner
Signature, if recorded	

No historic template date or printed name establishes approval of this revision.

5. References

- QM-001 Quality Manual — single consolidated manual and operating controls
- QM-003 Quality Objectives
- QP-011 Internal Audit — Owner QMS Self-Check; QM-001 §6.11 defines current reviews, and owner self-checks are not independent AS9100 audits
- QP-012 Management Review
- AS9100 Rev D Clause 5.2 — guidance and best-practice reference only

6. Revision History

Rev	Date	Description	Approved By
A	2025-07-14	Initial release (historical entry)	Shop Owner
B	2026-11-05	Align policy with customer-neutral basic controls; clarify no certification or quality-standard compliance claim and guidance-only standard references	Jacob Honick, Owner

Approval recorded from Jacob Honick's explicit instruction in the project conversation on 2026-11-05; no handwritten signature was created.

Revision C Approval

Approved 2026-11-05 by Jacob Honick, Owner. Standardize control metadata and annual review, remove fixed page counts and align applicable references and wording.
