QM-003 Quality Objectives

Standards and clause references are guidance only and do not claim certification or standard compliance. Applicable customer, contractual and legal requirements govern accepted work.

1. Purpose

Define measurable quality objectives that support the Quality Policy (QM-002), provide a basis for monitoring QMS performance, and drive continual improvement. These objectives are reviewed at each Management Review (QP-012) for continuing suitability.

2. Scope

These objectives apply to all QMS processes and are tracked by the Shop Owner using QF-037 Quality Objectives Tracker.

3. Quality Objectives

#	Objective	KPI	Target	Measurement Method	Frequency	Responsible
1	On-Time Delivery	Percentage of orders delivered by customer-requested date	>= 95%	(Orders delivered on time / Total orders shipped) x 100	Monthly	Shop Owner

#	Objective	KPI	Target	Measurement Method	Frequency	Responsible
2	First-Pass Yield	Percentage of parts passing final inspection without rework or scrap	>= 98%	(Parts accepted at final inspection / Total parts inspected) x 100	Monthly	Shop Owner
3	Customer Complaints	Number of customer complaints or returns received	< 2 per quarter	Count of QF-022 Customer Complaint forms initiated	Quarterly	Shop Owner
4	Corrective Action Closure	Average time to close corrective action requests	<= 30 calendar days	Average days from CAR initiation (QF-012) to verified closure	Quarterly	Shop Owner
5	Calibration Compliance	Percentage of measurement equipment calibrated on schedule	100%	(Instruments calibrated on time / Total instruments due) x 100	Monthly	Shop Owner
6	Supplier Quality	Percentage of incoming material/services accepted at receiving inspection	>= 98%	(Lots accepted / Total lots received) x 100	Quarterly	Shop Owner

4. Objective Details

4.1 On-Time Delivery (OTD)

- **Why it matters:** Late delivery directly impacts customer satisfaction and may result in loss of future orders
- **Data source:** Job Traveler (QF-004) ship date vs. customer-requested delivery date
- **Escalation:** If OTD drops below 90% in any month, initiate root cause analysis and consider corrective action (QP-009)

4.2 First-Pass Yield (FPY)

- **Why it matters:** Rework and scrap consume capacity in a single-operator shop and indicate process control issues
- **Data source:** Final Inspection Reports (QF-006) - count of accept vs. reject dispositions
- **Escalation:** If FPY drops below 95% in any month, initiate corrective action (QP-009)

4.3 Customer Complaints

- **Why it matters:** Complaints indicate escaped nonconformances or failures to meet expectations
- **Data source:** Customer Complaint forms (QF-022) logged in NCR/CAR Log

- **Escalation:** Any complaint involving product safety triggers immediate corrective action (QP-009)

4.4 Corrective Action Closure Time

- **Why it matters:** Open CARs represent unresolved systemic issues; timely closure demonstrates effective corrective action
- **Data source:** NCR/CAR Log - date opened vs. date closed with effectiveness verification
- **Escalation:** Any CAR open beyond 60 days is flagged for Management Review

4.5 Calibration Compliance

- **Why it matters:** Out-of-calibration equipment may produce nonconforming product; on-time calibration supports reliable acceptance measurements and applicable customer requirements
- **Data source:** Calibration Log (QF-020) and Calibration Schedule (QF-030)
- **Escalation:** Any missed calibration triggers Out-of-Tolerance Impact Assessment (QF-033) per QP-010

4.6 Supplier Quality Acceptance

- **Why it matters:** Incoming nonconformances consume inspection time and may escape to production
- **Data source:** Receiving Inspection Records (QF-003) - accept vs. reject per lot
- **Escalation:** If a supplier's acceptance rate drops below 95%, initiate supplier corrective action (QF-035)

5. Tracking and Review

5.1 Data Collection

The Shop Owner records objective measurements using QF-037 Quality Objectives Tracker. Data is collected per the frequency specified in Section 3.

5.2 Management Review Input

Quality objective performance is a mandatory input to Management Review (QP-012). The review evaluates:

- Whether targets are being met
- Trends (improving, stable, or declining)
- Whether objectives remain relevant and appropriately challenging
- Need for corrective action or objective revision

5.3 Objective Revision

Objectives may be revised during Management Review when:

- Targets have been consistently met for 4+ consecutive periods (increase challenge)
- Targets are proven unrealistic based on process capability data
- Business context changes (new equipment, new customer requirements, scope change)

All revisions to this document follow QP-001 Document Control and QP-025 Control of Changes.
