QP-003 Purchasing and Supplier Management

1. Purpose and Scope

Control suppliers and purchases that affect customer product. Torchworx LLC is an owner-operated, single-member LLC. Suppliers are external organizations, not shop employees.

2. Responsibility

The owner reviews supplier suitability, obtains required customer approval, issues purchase orders, checks deliveries and maintains the records.

3. Supplier Approval

Any supplier used for customer work requires explicit customer approval, either individually or by a certification type accepted by the customer, when applicable. Record the customer, approval basis, permitted scope and supporting approval reference on QF-017 and QF-019 before use. Approval for one customer or scope does not authorize use for another.

When approval is by certification type, verify that the supplier's current certification covers the required scope and satisfies the customer's stated criteria. Torchworx LLC does not impose a universal ISO 9001, AS9100, NADCAP or aerospace-experience require-

ment. Apply certification, accreditation and traceability requirements when specified by the customer or other applicable requirements. Calibration providers are controlled under QP-010.

The owner confirms capability for the specific purchase. Customer approval does not replace verification that the material or service meets the order.

4. Purchasing and Flowdown

1. Use QF-002 to identify the material or service, quantity, delivery needs and applicable drawing/specification revision.
2. Identify applicable customer requirements, including inspection, certifications, traceability, record retention, right of access, special-process requirements and restrictions on sub-tier suppliers. Apply SUP-001 clauses only as identified on the purchase order.
3. Provide only the customer data needed for the order, to suppliers approved by that customer. Follow customer restrictions on data, export controls and controlled information.
4. Do not authorize substitutions, source changes or departures from customer requirements without the required written customer approval.
5. Verify incoming products and services under QP-004. Control suspect or nonconforming items under QP-008 and QP-016.

5. Monitoring and Records

Review supplier approval scope and any required certification before use. Review active suppliers at least annually and when quality, delivery or approval changes warrant it. QF-018 may summarize actual delivery and quality history. Hold further use when suitability or customer approval cannot be established. Use QF-035 for corrective action when warranted.

Keep QF-017 approval evidence, QF-019 status, applicable purchase orders and receiving records. QF-034 is available when a supplier review or audit is required; it is not a mandatory annual supplier audit. Retain records under QP-001 and SUP-003.

6. References

- QF-002 Purchase Order; QF-017 Supplier Evaluation; QF-018 Supplier Scorecard; QF-019 Approved Supplier List
- QF-034 Supplier Audit Checklist; QF-035 Supplier Corrective Action Request

- QP-001 Document Control; QP-004 Receiving Inspection; QP-008 Nonconforming Product Control; QP-010 Calibration and Measurement Control; QP-016 Counterfeit Parts Prevention
- SUP-001 Purchase Order Quality Clauses Addendum; SUP-003 Record Retention Schedule
- AS9100 clause 8.4, for guidance only; no certification or compliance claim
