QP-021 Customer Property Control

Standards and clause references are guidance only and do not claim certification or standard compliance. Applicable customer, contractual and legal requirements govern accepted work.

1. Purpose

Define the process for receiving, identifying, protecting, and returning customer-furnished property (material, tooling, fixtures, drawings, or intellectual property) to prevent loss, damage, or unauthorized use.

2. Scope

Applies to all tangible and intangible property furnished by the customer for use in production, including raw material, castings/forgings, tooling, fixtures, gauges, drawings, data, and test specimens.

3. Responsibilities

Role	Responsibility
Shop Owner	Receive and verify customer property, record in Customer Property Log, identify and protect from damage or loss, notify customer of any loss/damage/unsuitability, return property as directed

4. References

- QF-024 — Customer Property Log
- QP-008 — Nonconforming Product Control
- QP-023 — Customer Communication and Complaints
- AS9100 Rev D Clause 8.5.3 (Property Belonging to Customers or External Providers)

5. Definitions

- **Customer Property:** Any material, tooling, fixtures, intellectual property, data, or equipment provided by the customer for use in fulfilling a contract.
- **Customer Property Log:** Register tracking all customer-furnished items: receipt date, description, condition, storage location, and disposition/return date.

6. Procedure

Receipt and Verification

1. Upon receipt of customer-furnished property, inspect for quantity and condition (damage, completeness).
2. Record in QF-024 Customer Property Log: date received, customer name, description, quantity, condition at receipt, associated PO/job number.
3. If property is received damaged or not as described, do NOT use. Notify the customer within 24 hours. Record the notification on QF-024.

Identification and Tagging

1. Tag or label all customer property with "CUSTOMER PROPERTY" identification, customer name, and associated job number.
2. Do not intermingle customer property with shop-owned material or tooling without clear identification.

Protection and Storage

1. Store customer property in designated areas appropriate to its type:
    - Material/castings: material rack, clearly labeled
    - Tooling/fixtures: tool crib or designated shelf, protected from damage
    - Drawings/data: controlled document area (physical or electronic)
2. Apply the same preservation practices as shop-owned items of similar type (corrosion prevention, climate control if required).
3. Do not use customer property for purposes other than the contracted work without written customer permission.

Reporting Loss or Damage

1. If customer property is lost, damaged, or found unsuitable for use at any point:
    - Stop using the affected item immediately.
    - Record the event on QF-024 (date, description of loss/damage, circumstances).
    - Notify the customer within 24 hours per QP-023.
    - Retain damaged property for customer inspection unless otherwise directed.

Return Process

1. Upon completion of the contracted work (or at customer request), return customer property in the condition received (normal wear excepted).
2. Record the return on QF-024: date returned, method of return, condition at return.
3. Obtain acknowledgment of return when feasible (shipping receipt, email confirmation).

7. Records Generated

Form No.	Title	When Completed
QF-024	Customer Property Log	At receipt, upon any event, and at return of customer property

8. Revision History
